ABOUT ME

Student nearing the completion of the 42 School curriculum (RNCP-7 in progress), specializing in software development and backend architectures. Autonomous, rigorous, and effective in complex technical environments.

EXPERIENCE

R&D Engineer - Synopsys Inc.

Sophia Antipolis, PACA

February 2025 - January 2026

- Designed and built an interface enabling users to select, inspect, and visualize simulation scenarios for autonomous driving systems in one place, replacing manual file handling and configuration with a streamlined, user-friendly workflow.
- Built and maintained APIs using Python (FastAPI) with REST/gRPC endpoints.
- Designed and optimized backend services for simulation workflows, ensuring reliability and low-latency data delivery.
- Developed interactive 3D features using Typescript (React) and ThreeJS, allowing the pre-visualization of simulations for autonomous vehicles sensors.
- Converted and standardized JSON-based and ASAM-based simulation scenarios for Physically Accurate Sensor Simulation into DTO schemas to streamline data exchange across services.
- Collaborated closely with simulation engineers to align data structures with evolving physical models.
- Delivered cross-team features in coordination with simulation, UX, and documentation teams, ensuring end-to-end functional alignment.
- Contributed to UX design workflows through wireframes and interface improvements (Figma).
- Operated in an Agile/Scrum environment (daily stand-ups, sprint planning, retrospectives).

E-Commerce Manager - Danyberd

Nice, PACA

January 2020 - October 2024

- Customized the UI and front-end of the e-commerce platform to improve navigation, product visibility, and conversion flow.
- Produced and edited packshots and product photos, ensuring high-quality visuals for catalog and marketing needs.
- Handled order processing, customer communication, returns, and logistics coordination.
- Maintained product listings, stock accuracy, and pricing updates to ensure smooth store operations.

EDUCATION

RNCP-7 IT Architecture Expert - 42 School

Nice, PACA

September 2021 - Today

- C programming, low-level memory management, and Unix system concepts.
 - Algorithmics, data structures, parsing and problem-solving.
 - Web development, authentication flows, and relational databases.
 - Docker, containerized environments and deployment.
 - Computer graphics, ray-casting and rendering.
 - Networking, real-time communication (WebRTC) and API interactions.
 - Git-based workflows, peer code reviews, collaborative development.
 - Autonomaus learning, long-term project delivery, rigorous debugging methodologies.
-

SKILLS

Programming language

• Javascript • Typescript • Python • C • C++ • Php • Java • HTML5 • CSS • Docker • SQL

Software Architecture

• Microservices • Rest/gRPC APIs • Domain-Driven Design • Event-Driven Systems
• CI/CD Pipelines • Docker

Frontend

• React • Redux • ThreeJS • WebGL / 3D rendering • AntDesign • Material UI • Tailwind CSS • Figma

Backend

• Python • FastAPI • Django • Microservices Architecture • Node.js • PostgreSQL • MySQL

Soft Skills

• Autonomous • Active Listening • Flexible • Reactive • Curious • Effective Communication • Proactive

Languages

• French (Native) • English (Professionnal) • Spanish (School-level)
